The first new service to be launched on the Inmarsat-4 satellites will be BGAN - the first mobile satellite service to deliver broadband data and voice, simultaneously through one device, to almost anywhere on the planet. Based on IP technology, BGAN will deliver data rates of up to half a megabit.

Standard IP ranges, differing between units, from 384 kbps downlink to 432 kbps and 240 kbps uplink to 492 uplink. Streaming IP 32, 64 kbps to 32,64,128,256 kbps. Voice via RJ11, Bluetooth and/or via ISDN handset. **\*\* Call for more details and airtime pricing!**
